

Symantec Enterprise Security Forum

Seminar Summary:

Top management continues to shift their attention to securing organizations' critical infrastructure and complying with emerging industry regulations. As their focus on security intensifies, the pressure on IT and security leaders to deploy manageable and cost-effective security programs is paramount.

This session will provide best practice recommendations for creating a security management strategy. Detailed discussions will focus on criteria for selecting managed security service providers, and how to build and maintain an internal team to manage security programs. Featured speakers will include:

Symantec Corporation, Neils Johnson, *Principal Technologist*

Symantec Corporation, Jim McLendon, *Vice President of Symantec Security Services Global Business Development*

L.J. Kushner & Associates, Lee Kushner, *CEO and Founder*
